COMPARISON OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD DESIGN

PROTOTYPE LINK

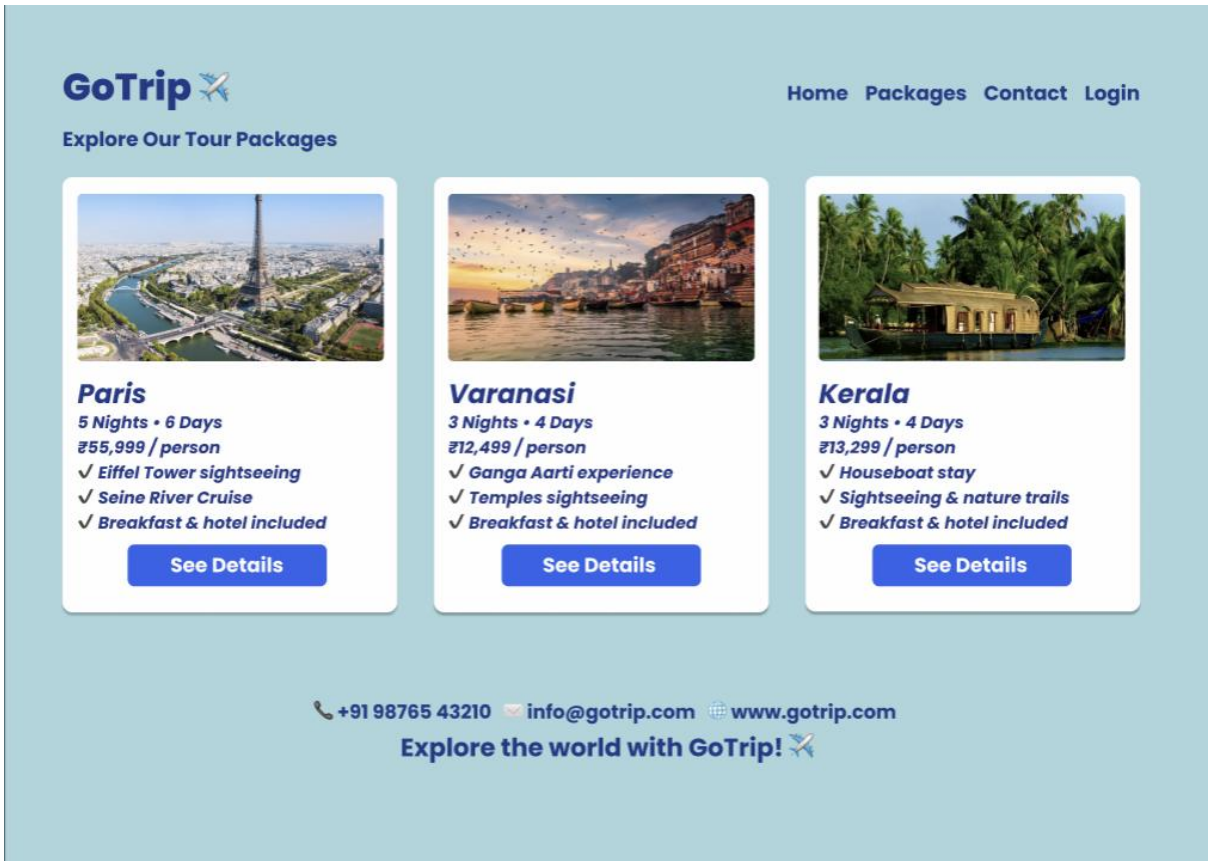
https://www.figma.com/design/SGGscSUA0vUx8fcq9z5SPR/Bad-Design?node-id=0-1&t=gdILBiDzoeVtdN4h-1

BAD DESIGN (GoTrip)

- Design Style: Uses very bright and harsh background colours, which strain the eyes. Lack of consistency in fonts, text sizes, and colours makes the layout look cluttered. Images are placed without proper spacing or alignment, creating a crowded appearance. Buttons use different colours and styles, reducing visual harmony.

- Content: Important information like price, duration, and destination is present but not clearly organized. Text overlaps with the background and sometimes lacks contrast, affecting readability. No additional details or highlights are given to guide the user's decision.
- Navigation: Navigation options are minimal and not clearly emphasized. The user does not immediately understand where to click or what action to take next.
- User Experience: The overall design feels confusing and unprofessional. Users may feel overwhelmed due to poor colour choices and inconsistent layout. The design does not build trust or encourage users to explore packages further.
- Purpose: Although it shows travel packages, the design fails to effectively attract or retain users. More focus is on placing content rather than improving usability.

GOOD DESIGN



PROTOTYPE LINK

https://www.figma.com/design/HmOqjhmpkOJrsl1Cy4I8UG/Good-Design?node-id=0-1&t=6qhXlSvxqNfVPE25-1

GOOD DESIGN (GoTrip)

- Design Style: Uses a soft, calm colour palette that is pleasant and travel-friendly. Consistent use of fonts, colours, and card layouts gives a clean and modern look. Proper spacing, alignment, and rounded cards improve visual balance. Icons and images are neatly arranged, enhancing professionalism.
- Content: Each travel package is displayed in a separate card, making information easy to scan. Clear details such as destination, duration, price, and included features are listed. Bullet points help users quickly understand what each package offers.
- Navigation: A well-structured navigation bar with Home, Packages, Contact, and Login options. Navigation is intuitive, allowing users to move easily through the website.
- User Experience: The design feels organized, trustworthy, and user-friendly. Clear "See Details" buttons guide users toward the next action. Users can quickly compare packages without confusion.
- Purpose: Effectively promotes travel packages while maintaining clarity and aesthetics. Encourages exploration and gives users confidence to choose a package.

Key Differences Between the Two Designs

- Visual Appeal: The bad design looks cluttered and harsh, while the good design is clean and calming.
- Readability: The good design uses better contrast and spacing, making text easier to read.
- User Experience: The bad design can confuse users; the good design guides users smoothly.
- Professionalism: The good design appears more reliable and suitable for a real travel website.
- Overall Impact: The bad design focuses only on displaying content, whereas the good design focuses on usability, aesthetics, and user satisfaction.
