EXPERIMENT – 7

NAME: VEDHASREE S

REGISTER NUMBER: 240701580

Design an application layout using different colours, text styles, and visual elements using GIMP (GNU Image Manipulation Program). Share the design with users through a Google Form or any other feedback collection method to gather their responses. Based on the feedback received, refine and improve the design accordingly.

Two versions of a shopping application were designed, including Sign Up, Sign In, and Home screens. Both versions follow the same structure but use different color schemes to create varied visual experiences. Design A uses light grey and white color tones to create a clean and minimal appearance. Design B uses light blue, green, and white shades to provide a more vibrant and refreshing look. Both versions use different color schemes to create varied visual experiences. The first design presents a simple and minimal look, while the second design uses softer and more lively colors to make the interface more attractive. A Google Form was created to share these designs and collect user feedback on aesthetics and usability.

Design A

Sign Up

- The screen uses a white background to provide a clean and simple appearance.
- The title and field labels such as Name, Email, and Password are displayed in black color for clear visibility.
- Input text boxes are provided in light grey color to distinguish them from the background.
- The Sign Up button is designed in blue color to highlight the primary action.
- The text inside the Sign Up button is white to improve readability.

Sign In

• The screen maintains a white background to keep the interface clean and simple.
• The heading and field labels such as Email and Password are shown in black for better readability.
• Light grey text boxes are used for user input fields.
• The Sign In button is displayed in blue and the button text in white to emphasize the main action.

Home

• The top section uses a grey background to highlight the header area.

• The title is displayed in white for clear visibility against the grey background.

• A search bar is provided below the title and address for easy product search.

• Cart, hamburger menu, and user profile icons are placed at the top right for quick access.

• The product display area uses a white or cream background to separate it from the header.

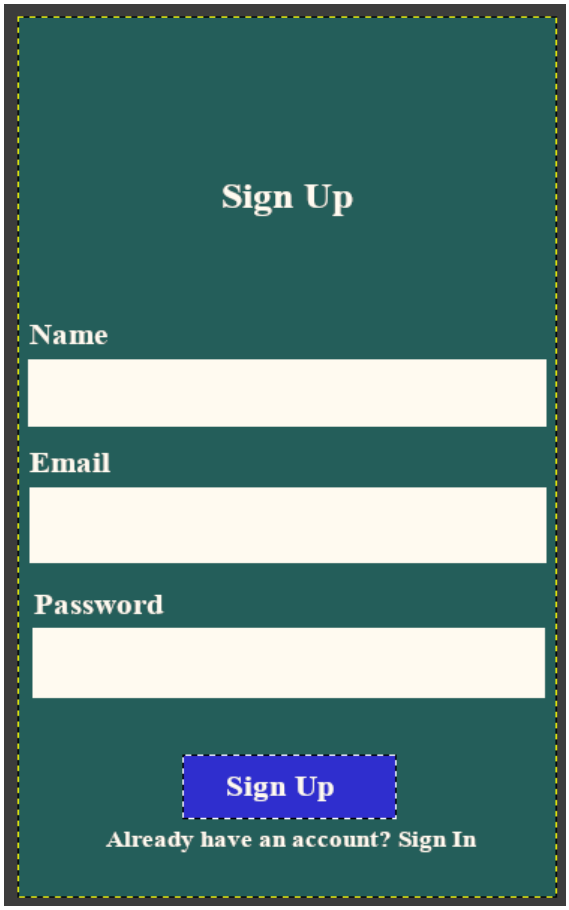
• Product images are arranged in the main content section.

• Each product image is followed by its description.

• The product descriptions is shown in white text.

Design B

Sign Up



• The screen uses a slightly dark green background to create a fresh visual appearance.

• The title and field labels such as Name, Email, and Password are displayed in white color.

• Input text boxes are provided in white to maintain consistency with the text.

• The Sign Up button is designed in blue, similar to the previous design.

• The text inside the Sign Up button is white for better readability.

Sign In

- The screen uses a slightly dark green background to maintain a consistent visual style.
- The heading and field labels such as Email and Password are displayed in white color.
- Input text boxes are provided in white for a clean appearance.
- The Sign In button is displayed in blue, similar to the previous design.
- The button text is in white to ensure readability.

Home

• The top section uses a light blue background to highlight the header area.

• The title is displayed in black for clear visibility.

• Cart, hamburger menu, and user profile icons are placed at the top right.

• A search bar is provided below the title and address for searching products.

• The product display area uses a dark green background to create contrast.

• Product images are arranged in the main content section.

• The product descriptions are displayed in white text below the images.

Any suggestions to improve the design?

1 response

Typography should be minimal and font size should be a little bit smaller
