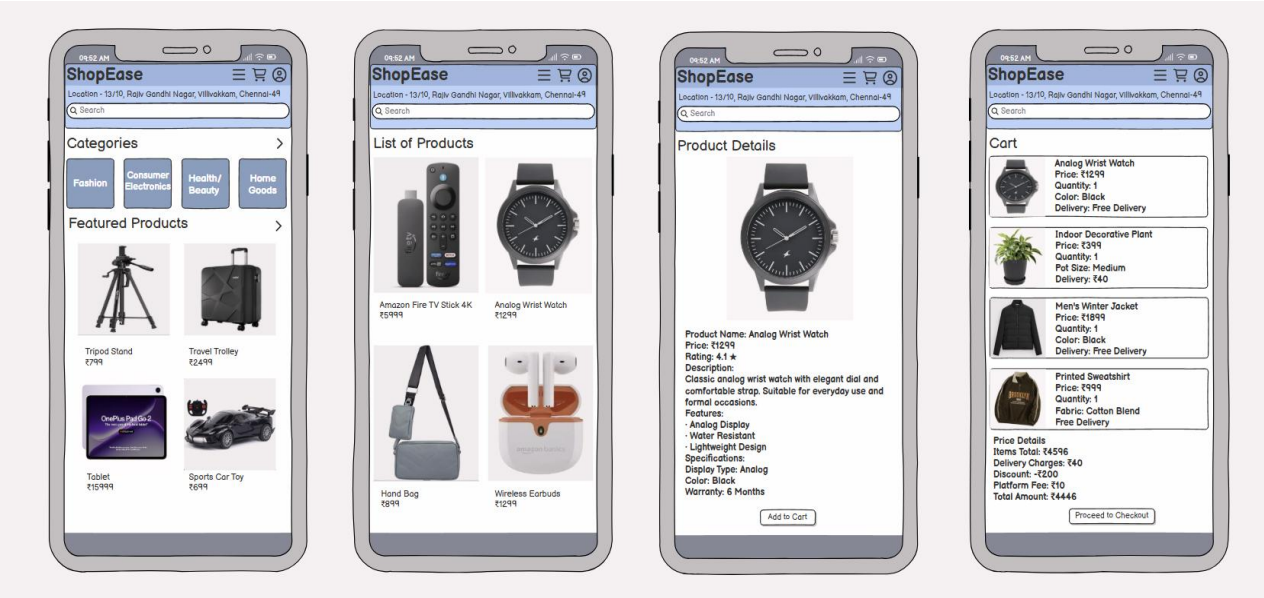
Create storyboards to represent the user flow for a mobile app using Balsamiq



This storyboard shows the user flow of an E-commerce mobile application. It demonstrates how users browse products, view details, and add items to the cart.

Home Screen

The Home screen acts as the entry point of the application. It allows users to explore different product categories and featured items. Users can quickly search for products or select any item displayed.

- Application title and header
- Search bar for product search
- Categories section for browsing
- Featured products displayed in grid layout
- Navigation icons for menu and cart

Product List Screen

The Product List screen displays multiple products available under a category. Users can view product images and prices, and select any product to see more details.

- Grid layout of products
- Product images

• Product names
• Price information
• Easy product selection

Product Details Screen

The Product Details screen provides complete information about the selected analog wrist watch. It helps users understand the product before adding it to the cart.

• Product image
• Product name
• Price details
• Rating information
• Product description
• Key features list
• Product specifications
• Add to Cart button

Cart Screen

The Cart screen shows all selected items along with pricing information. It summarizes the order before proceeding to checkout.

• Selected products list
• Product price details
• Quantity information
• Delivery charges
• Discount information
• Total amount calculation
• Proceed to Checkout button
